

# Safety Regulations AlpenFlow 2022 COVID-19

## Status: 6.5.2022 - Information

**Reason:** The following explanations shall help to minimize the risk of an infection with COVID -19 to the best effect

**Valid:** Immediately until revoked

## Presence

### Principle

- Minimizing risk is our top priority
- The principle of individual responsibility applies to all addresses
- The safety regulations apply to all venues and must be observed from beginning to end of the meeting
- Persons, who are classified as member of a risk group, according to the "COVID-19 Risk Groups Prescription", are not allowed to attend the meeting

### Attending the meeting is not possible, in the event of

- Being infected with a cold or infectious disease (including infection with the corona virus).
- One or more of the listed symptoms, which, according to common definitions, may indicate an infection with the corona virus:
  - o Fever, feeling of fever o Sore throat
  - o Cough (mostly dry)
  - o Shortness of breath
  - o Muscular pain
  - o Sudden loss of the olfactory sense and/or sense of taste
- Less frequently occurring symptoms:
  - o Conjunctivitis
  - o Headaches
  - o Gastrointestinal symptoms
  - o Cold
- Persons suspected of having fallen ill are not allowed to attend the meeting.
- Persons who are issued with a traffic restriction by official notice can participate by permanently wearing an FFP2 mask even in presence.

---

**Addressed to:** all participants, lectures, company members, all external staff members

Health comes first – Austrian Society for Cytometry adopts this principle. Therefore, to ensure a good cooperation, it is necessary that all participants, lectures, company members, all external staff members comply with the given rules.

### Entering the *Kongress and TheaterHaus* Bad Ischl (building)

- Please observe the rules of conduct posted for the common areas.
- The entrance to the building is open on a regular basis.
- The entrance to the building assigned to the seminar rooms is to be used.
- A FFP2 mask **is recommended** to be worn when entering the building.
- After entering the building: wash or disinfect hands.

## General hygiene measures

### Hygiene measures for persons at the *Kongress and TheaterHaus*

- Observe the general hygiene rules:
  - Wash hands (avoid hand contact)
  - Do not touch eyes, nose and mouth
  - Adhere to respiratory hygiene
- During the event, the FFP2 mask may be removed at the seat. It is recommended to be put back on immediately when leaving the seat.
- Presenters do not need to wear a FFP2 mask during the presentation.
- In case of symptoms, call 1450! Inform your course management immediately.

### Hygiene measures in the building

- Air the room regularly! Ideally for at least five minutes after every hour (cross ventilation if possible).
- Leave the building after you have served your purpose. Do not stay in the building, for example to bridge waiting times.

### Hygiene measures in breaks and social areas

- When using social areas, pay particular attention to the minimum of 1 meter distance.
- Avoid crowding and physical proximity in aisles or other confined space situations.
- It is best to spend breaks outdoors, as far as this is possible and reasonable.
- The FFP2 mask may/can be removed for the consumption of food and beverages.

## Further protective measures

### Meeting-specific protective measures

The 3G rule (vaccinated, recovered or tested) currently applies to attending on-campus courses. The application and control of the 3G rule applies as described in the current notice "Application 3-G Rule" [Homepage Zytometrie](#).

Wearing a FFP2 face mask is **recommended** in the Kongress and TheaterHaus building. During a session, the FFP2 mask may be removed at the seat.

Depending on the content and didactics of the course (practicals, exercises, etc.), specific safety regulations may be prescribed by the session lecturer.

Your session lecturer will inform you of this in advance.

### Contact documentation (also outside of course time).

In case of infection, a fast and complete recording of your contacts is of great importance for the interruption of infection chains. We therefore strongly recommend that you keep a private contact diary or document contacts lasting longer than 5 minutes in a traceable manner.

### Consultation

Should any uncertainties arise regarding individual situations, the COVID-19 officer (**Dr. Beate Rinner**) will be happy to answer your questions and provide solutions at any time.
